# | About us

# Our company culture

Our software development company culture thrives on a dynamic blend of creativity, trust, and problem-solving.

Our team is encouraged to explore creative solutions, fostering an immersive atmosphere that sparks innovation. Trust is the cornerstone of our collaborations, enabling open communication and reliable code delivery. We approach challenges with a problem-solving mindset, analyzing intricacies and devising optimal strategies.

This synergy of creativity, trust, and problem-solving not only cultivates a positive work environment but also drives us to develop cutting-edge solutions that empower our clients and enrich user experiences, making us a better company.

**Creativity.** Coding solutions, tailored designs, and inventive problem-solving, leading to unique and impactful products.

**Trust.** Foundation for effective teamwork, reliable communication, successful projects, ensuring client long-term partnerships.

**Problem-Solving.** Challenges are met with analytical thinking, innovative solutions, and continuous learning for optimal results.

## Scope

**We are a software development company that loves to build amazing web and mobile apps.**

Our purpose is to create unique, creative, and quality apps. that are developed upon the latest modern coding and developing techniques, using the most up-to-date, structured coding frameworks so that our developers can take it to the next level with ease.

In order to fulfill these aspects, code must be written as cleanly as possible, understandable, covered by automated tests, flexible, and maintainable.

| Services

## Web development

We design and develop **tailored applications, APIs** for web and mobile, **multitenancy applications** and we can provide ongoing maintenance as part of custom software development services.

Large scale applications are implemented using **Domain Driven Design** pattern and **Event Driven Development** pattern.

We always use best practices and **SOLID** principles.

## Laravel

We love working with Laravel framework and all the ecosystem that it offers. We use Laravel Nova administration panel, Laravel Envoyer for zero downtime deployment and Laravel Forge for customers server management and applications deployment along with many other amazing packages.

**Laravel Nova.** Powerful administration panel that simplifies and streamlines the process of building and managing web applications.

**Laravel Forge.** Tool that simplifies server provisioning and deployment, making it easier for our developers to manage web applications.

**Certified Developers.** Ensuring proficient and reliable development for creating high-quality web applications with enhanced functionality.

## Mobile Development

We use technologies for **cross-platform development**, we develop one codebase that will work seamlessly for multiple operating systems, including iOS and android.

This approach simplifies development, reducing the need for separate codebases for iOS and Android. It enhances efficiency, ensures consistent user experiences, and accelerates updates, making it an optimal choice for businesses seeking cost-effective and time-efficient solutions in app development.

## UI/UX Design

We offer the knowledge and experience we've gained from designing dozens of applications to designing a new one from scratch.

User Interface (UI) design focuses on creating visually appealing and intuitive interfaces that facilitate smooth interaction with our apps. User Experience (UX) design, aims to enhance overall user satisfaction by ensuring usability, accessibility, and pleasure in the interaction with the product.

Our UI/UX designer collaborate closely with developers and product managers. This collaboration ensures that design decisions align with technical capabilities and user needs. Effective UI/UX design not only attracts users but also enhances their engagement, leading to longer usage and higher customer retention rates. It creates a strong brand identity, fosters customer loyalty, and ultimately contributes to the company's growth and success in the competitive software market.

## Product Strategy

Product strategy is the blueprint that guides a software development company's venture. It involves defining the vision, goals, and roadmap for a product's lifecycle. This strategy outlines target markets, user needs, competitive analysis, and key features. Effective product strategy aligns with business objectives, market trends, and customer feedback, ensuring the development process remains focused and responsive.

Incorporating a well-defined product strategy minimizes scope creep, enhances resource allocation, and accelerates time-to-market. It encompasses aspects like market research, user personas, and MVP (Minimum Viable Product) planning. Iterative development, regular feedback loops, and adaptability to changing demands are essential. Successful product strategy also entails continuous monitoring, analyzing metrics, and incorporating insights for enhancements.

Overall, a robust product strategy is essential for creating customer-centric, innovative software solutions that cater to market needs while sustaining the company's growth and competitiveness.

## DevOps

DevOps practices allow emphasize collaboration, communication, and automation throughout the software development lifecycle.

Our DevOps practices involve continuous integration (CI) to merge code changes regularly, automated testing, and continuous delivery (CD) for seamless deployment. This accelerates development cycles, reduces errors and enhances product stability.

Monitoring and feedback loops ensure quick detection and resolution of issues. DevOps also promotes scalability and flexibility by utilizing cloud infrastructure and infrastructure-as-code practices. In essence, DevOps transforms software development into a collaborative and iterative process that enables companies to deliver value to customers more swiftly, adapt to market changes, and maintain a competitive edge.

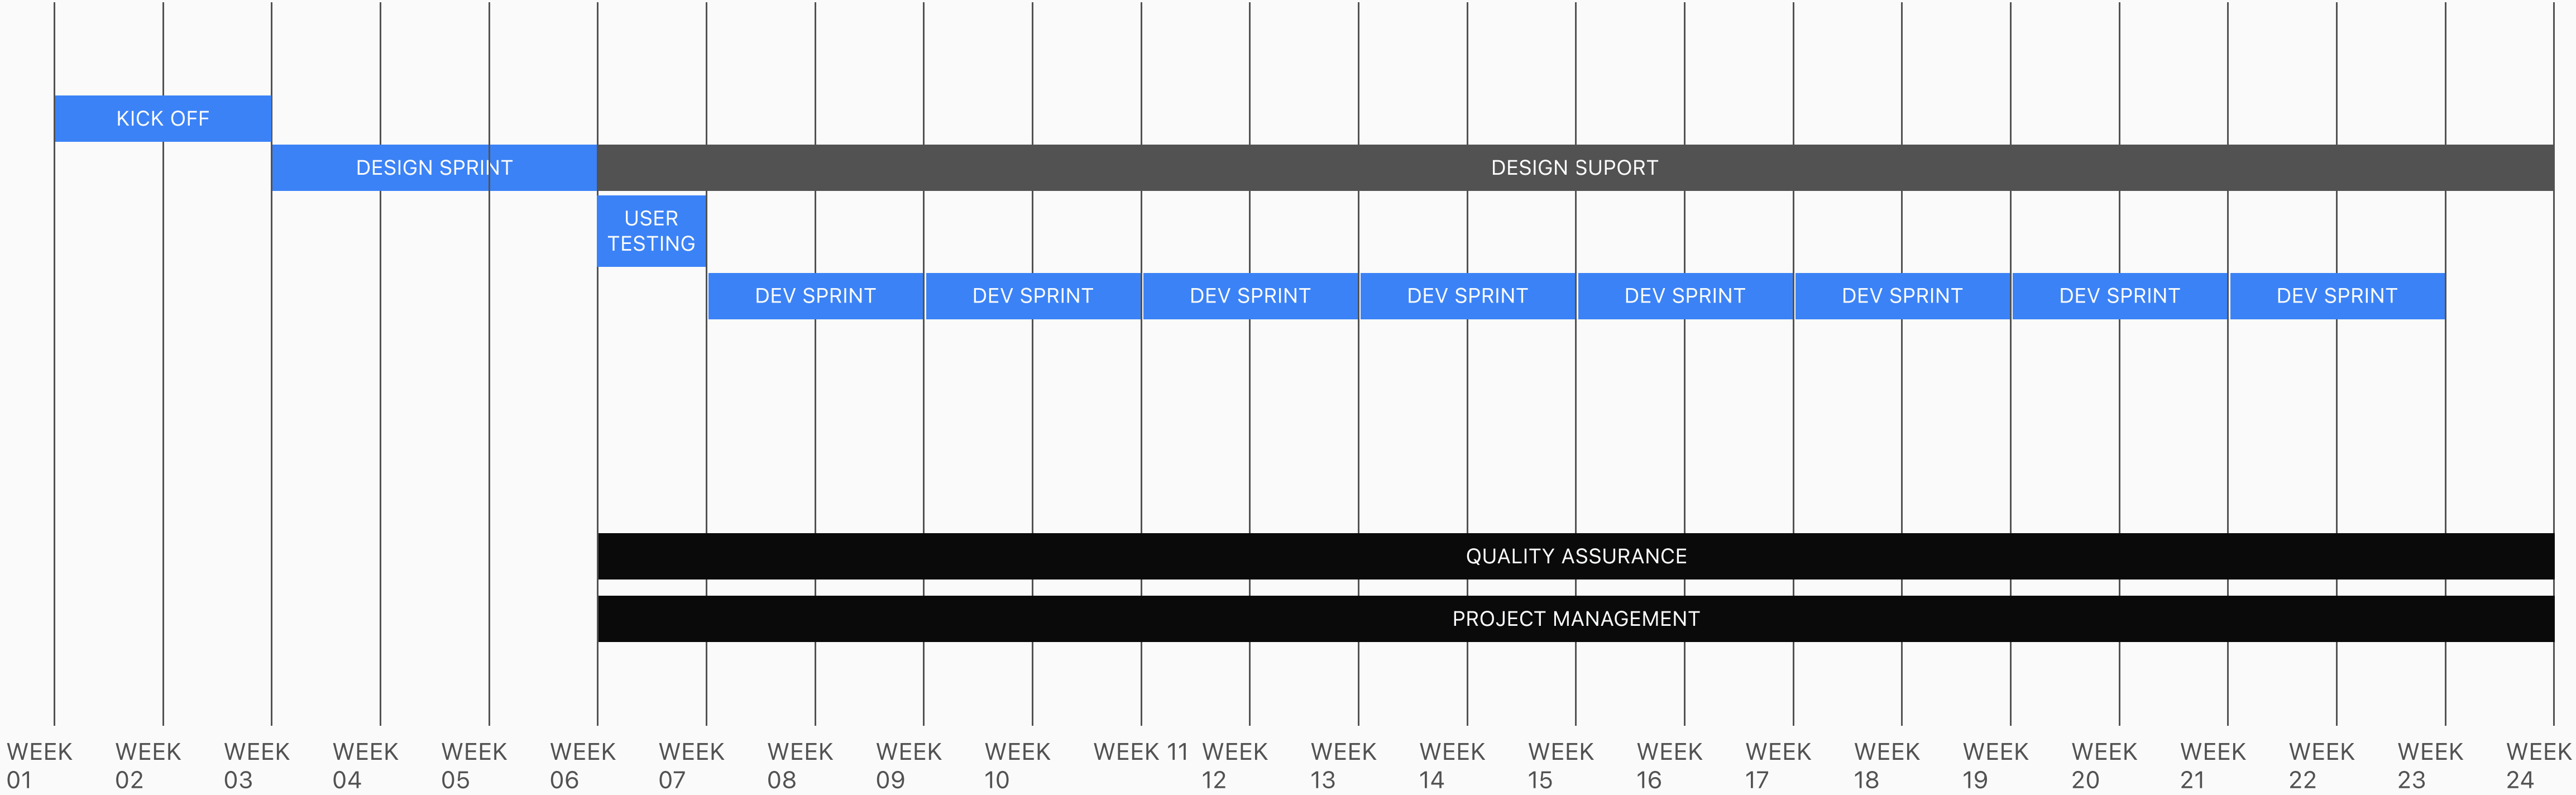

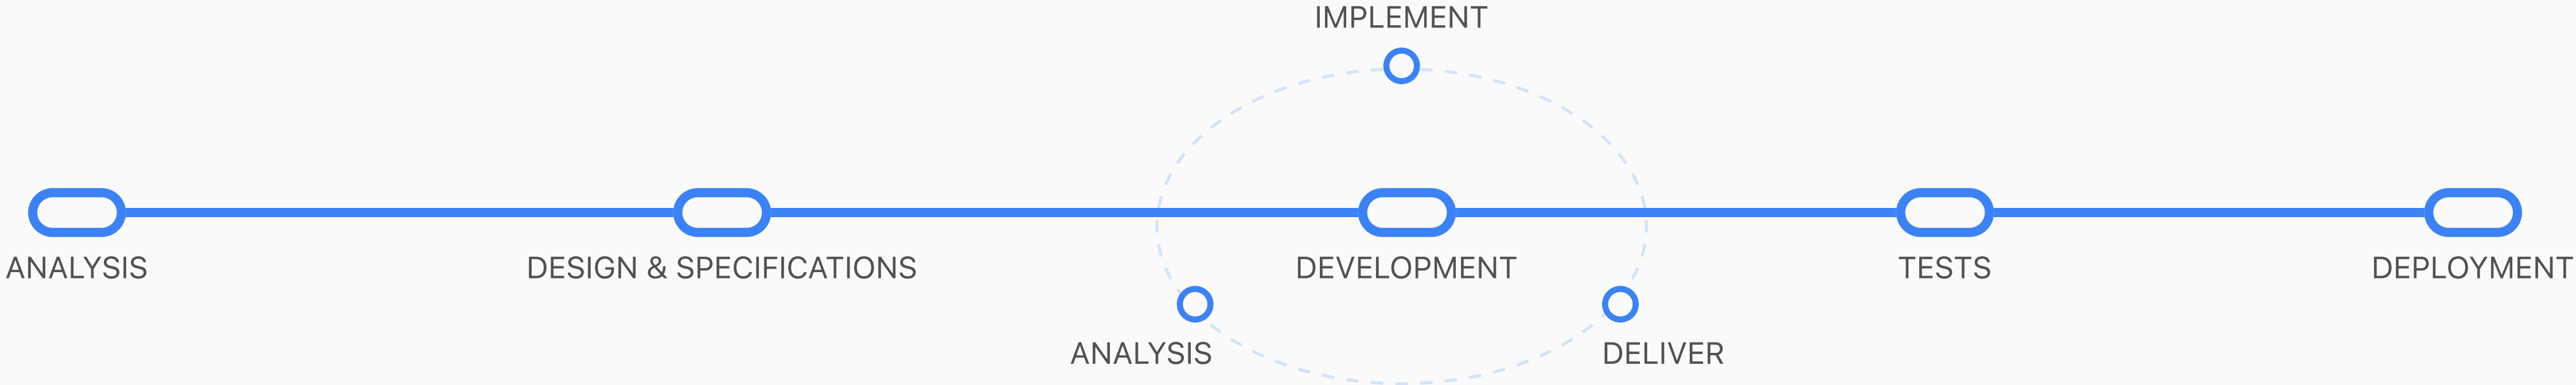

## Cloud Services

Cloud services play an important role in our software development company. These services offer scalable infrastructure, enabling efficient resource allocation and cost optimization. Developers leverage cloud platforms like Amazon Web Services, DigitalOcean, and Microsoft Azure to deploy and manage applications. The cloud's elasticity promotes agile development, allowing our team to quickly iterate and innovate.

DevOps practices are streamlined through cloud services, enabling automated deployment pipelines, continuous integration, and seamless collaboration. Moreover, cloud-based storage and databases facilitate data management and access. As security is important, these platforms offer robust tools for encryption, identity management, and compliance, ensuring a reliable foundation for software.

**Scientifically based solution platform for improving school performance**

brio.ro

An ordinary test, corrected by the same person who made it, is not the most relevant criterion to determine the level of a student.

A student's grade on these types of tests is inevitably influenced by the mildness or severity of the grader, as well as the difficulty of the questions and the degree of subject coverage.

Furthermore, two students who get the same grade on an identical test may have very different deficiencies.

# Green Leader

## Online marketplace.

Through this online marketplace, customers based in Romania can buy products based on honey and pollen from local producers. The platform is divided into 3 parts: the API, the front-end and the hybrid mobile application. The API was built in PHP with Laravel Framework and the front-end in HTML, CSS, JavaScript, with templating engine Blade and Vue.js using the Tailwind Framework. The hybrid mobile application is developed in Ionic with Vue.js and for compiling the code we used Capacitor. **The mobile application is available on App Store and Google Play.**

A început să producă produse apicole din dragoste, cum toată viața a făcut doar ceea ce i-a plăcut și a iubit. Și din încredere deplină că albinăritul este o ocupație ce întreține sănătatea, atât a celor ce o practică, cât și a celor ce li consumă roadele.

# Transports

Multi-tenant application for transport companies.

Transports has been developed in order to solve a problem that may occur in companies whose main object of activity is transport, focusing on passenger transport, namely the roadmaps management and the subscriptions management. The back-end was built in PHP with Laravel Framework and the front-end in HTML, CSS, JavaScript, with templating engine Blade and Vue.js. The application uses multi-tenant architecture.

The screenshot shows the 'Subscriptions' management page. The left sidebar is dark blue with the 'Subscriptions' menu item highlighted. The main content area has a white background with a search bar and a 'Create Subscription' button. Below is a table with 10 rows of subscription data. The table columns are: ID, SERIES NUMBER, PERSON, MONTH YEAR, DAYS, INTERMEDIATE ROUTE, PRICE, STATUS, ACTIVE, and CREATED AT. The status column contains 'Paid', 'Unpaid', and 'Canceled' with corresponding colored dots. A 'Trashed Subscriptions' button is located at the bottom right.

ID	SERIES NUMBER	PERSON	MONTH YEAR	DAYS	INTERMEDIATE ROUTE	PRICE	STATUS	ACTIVE	CREATED AT
10	A 10	Person 10	01 2021	20	Route 1 - Route 2	50\$	Paid	●	2021-01-01 10:00
9	A 9	Person 9	01 2021	20	Route 1 - Route 2	50\$	Paid	●	2021-01-01 09:00
8	A 8	Person 8	01 2021	18	Route 3 - Route 4	25\$	Paid	●	2021-01-01 08:00
7	A 7	Person 7	01 2021	18	Route 3 - Route 4	25\$	Paid	●	2021-01-01 07:00
6	A 6	Person 6	01 2021	16	Route 5 - Route 6	20\$	Paid	●	2021-01-01 06:00
5	A 5	Person 5	01 2021	16	Route 5 - Route 6	20\$	Paid	●	2021-01-01 05:00
4	A 4	Person 4	01 2021	14	Route 7 - Route 8	15\$	Paid	●	2021-01-01 04:00
3	A 3	Person 3	01 2021	14	Route 7 - Route 8	15\$	Paid	●	2021-01-01 03:00
2	A 2	Person 2	01 2021	12	Route 8 - Route 10	10\$	Unpaid	●	2021-01-01 02:00
1	A 1	Person 1	01 2021	12	Route 8 - Route 10	10\$	Canceled	●	2021-01-01 01:00

The screenshot shows the 'Roadmaps' management page. The left sidebar is dark blue with the 'Roadmaps' menu item highlighted. The main content area has a white background with a search bar and a 'Create Roadmap' button. Below is a table with 10 rows of roadmap data. The table columns are: ID, SERIES NUMBER, ISSUE DATE, DRIVER, CAR, CASH REGISTER, ROUTE, ROUTE PROGRAM, STATUS, ACTIVE, and CREATED AT. The status column contains 'Pending', 'Finished', and 'Canceled' with corresponding colored dots. A 'Trashed Roadmaps' button is located at the bottom right.

ID	SERIES NUMBER	ISSUE DATE	DRIVER	CAR	CASH REGISTER	ROUTE	ROUTE PROGRAM	STATUS	ACTIVE	CREATED AT

# Manager

Custom ERP for manufacturing company.

The application fulfills all the stages of a complete technological process, starting from the goods to the obtaining of the finished product, being covered all the stages of the technological process, following the delivery of the finished product to the customer. The application is an SPA. Based on application's specifics, we started with the mockup & prototype over which we added the design. After everything has been defined and accepted, XCODES DEVELOPMENT team started to build the application. The API was built in PHP with Laravel Framework, and the front-end in Vue.js with Vuesax Framework. DevOps processes have been implemented, like continuous integration and continuous deployment.

The screenshot shows a web application interface with a dark sidebar on the left containing navigation icons. The main content area features a header with a search bar, a notification bell, and a user profile for 'Sabin Nițu' with the status 'Available'. Below the header is a table with 10 rows of goods inventory data. The table has columns for ID, PROVIDER, CATEGORY, SERIES, NUMBER, ISSUE DATE, DESCRIPTION, CREATED AT, and PAID. All 'PAID' cells contain a green dot. A pagination control at the bottom shows '1' in a blue circle.

ID	PROVIDER	CATEGORY	SERIES	NUMBER	ISSUE DATE	DESCRIPTION	CREATED AT	PAID
10	Provider 1	Goods	A	10	01-01-2021		01-01-2021 14:10	●
9	Provider 1	Goods	A	9	01-01-2021		01-01-2021 14:09	●
8	Provider 1	Goods	A	8	01-01-2021		01-01-2021 14:08	●
7	Provider 1	Goods	A	7	01-01-2021		01-01-2021 14:07	●
6	Provider 1	Goods	A	6	01-01-2021		01-01-2021 14:06	●
5	Provider 1	Goods	A	5	01-01-2021		01-01-2021 14:05	●
4	Provider 1	Goods	A	4	01-01-2021		01-01-2021 14:04	●
3	Provider 1	Goods	A	3	01-01-2021		01-01-2021 14:03	●
2	Provider 1	Goods	A	2	01-01-2021		01-01-2021 14:02	●
1	Provider 1	Goods	A	1	01-01-2021		01-01-2021 14:01	●

The screenshot shows a web application interface similar to the first one, but with a more detailed table. The table has columns for ID, PROVIDER, SPACE, CATEGORY, NAME, REMAINING AMOUNT, VALUE, TOTAL REMAINING VALUE, THICKNESS, DESCRIPTION, and CREATED AT. The 'REMAINING AMOUNT' and 'TOTAL REMAINING VALUE' columns show values in various units and currencies. The 'PAID' column is replaced by a red dot for the first row. A pagination control at the bottom shows '1', '2', and '3' in blue circles.

ID	PROVIDER	SPACE	CATEGORY	NAME	REMAINING AMOUNT	VALUE	TOTAL REMAINING VALUE	THICKNESS	DESCRIPTION	CREATED AT	
10	Provider 1	Space 1	Category 3	Good 6	5.00 items	150.00 \$	750.00 \$			01-01-2021 14:10	●

Total paid value **4,200.00**

Total due value **800.00**

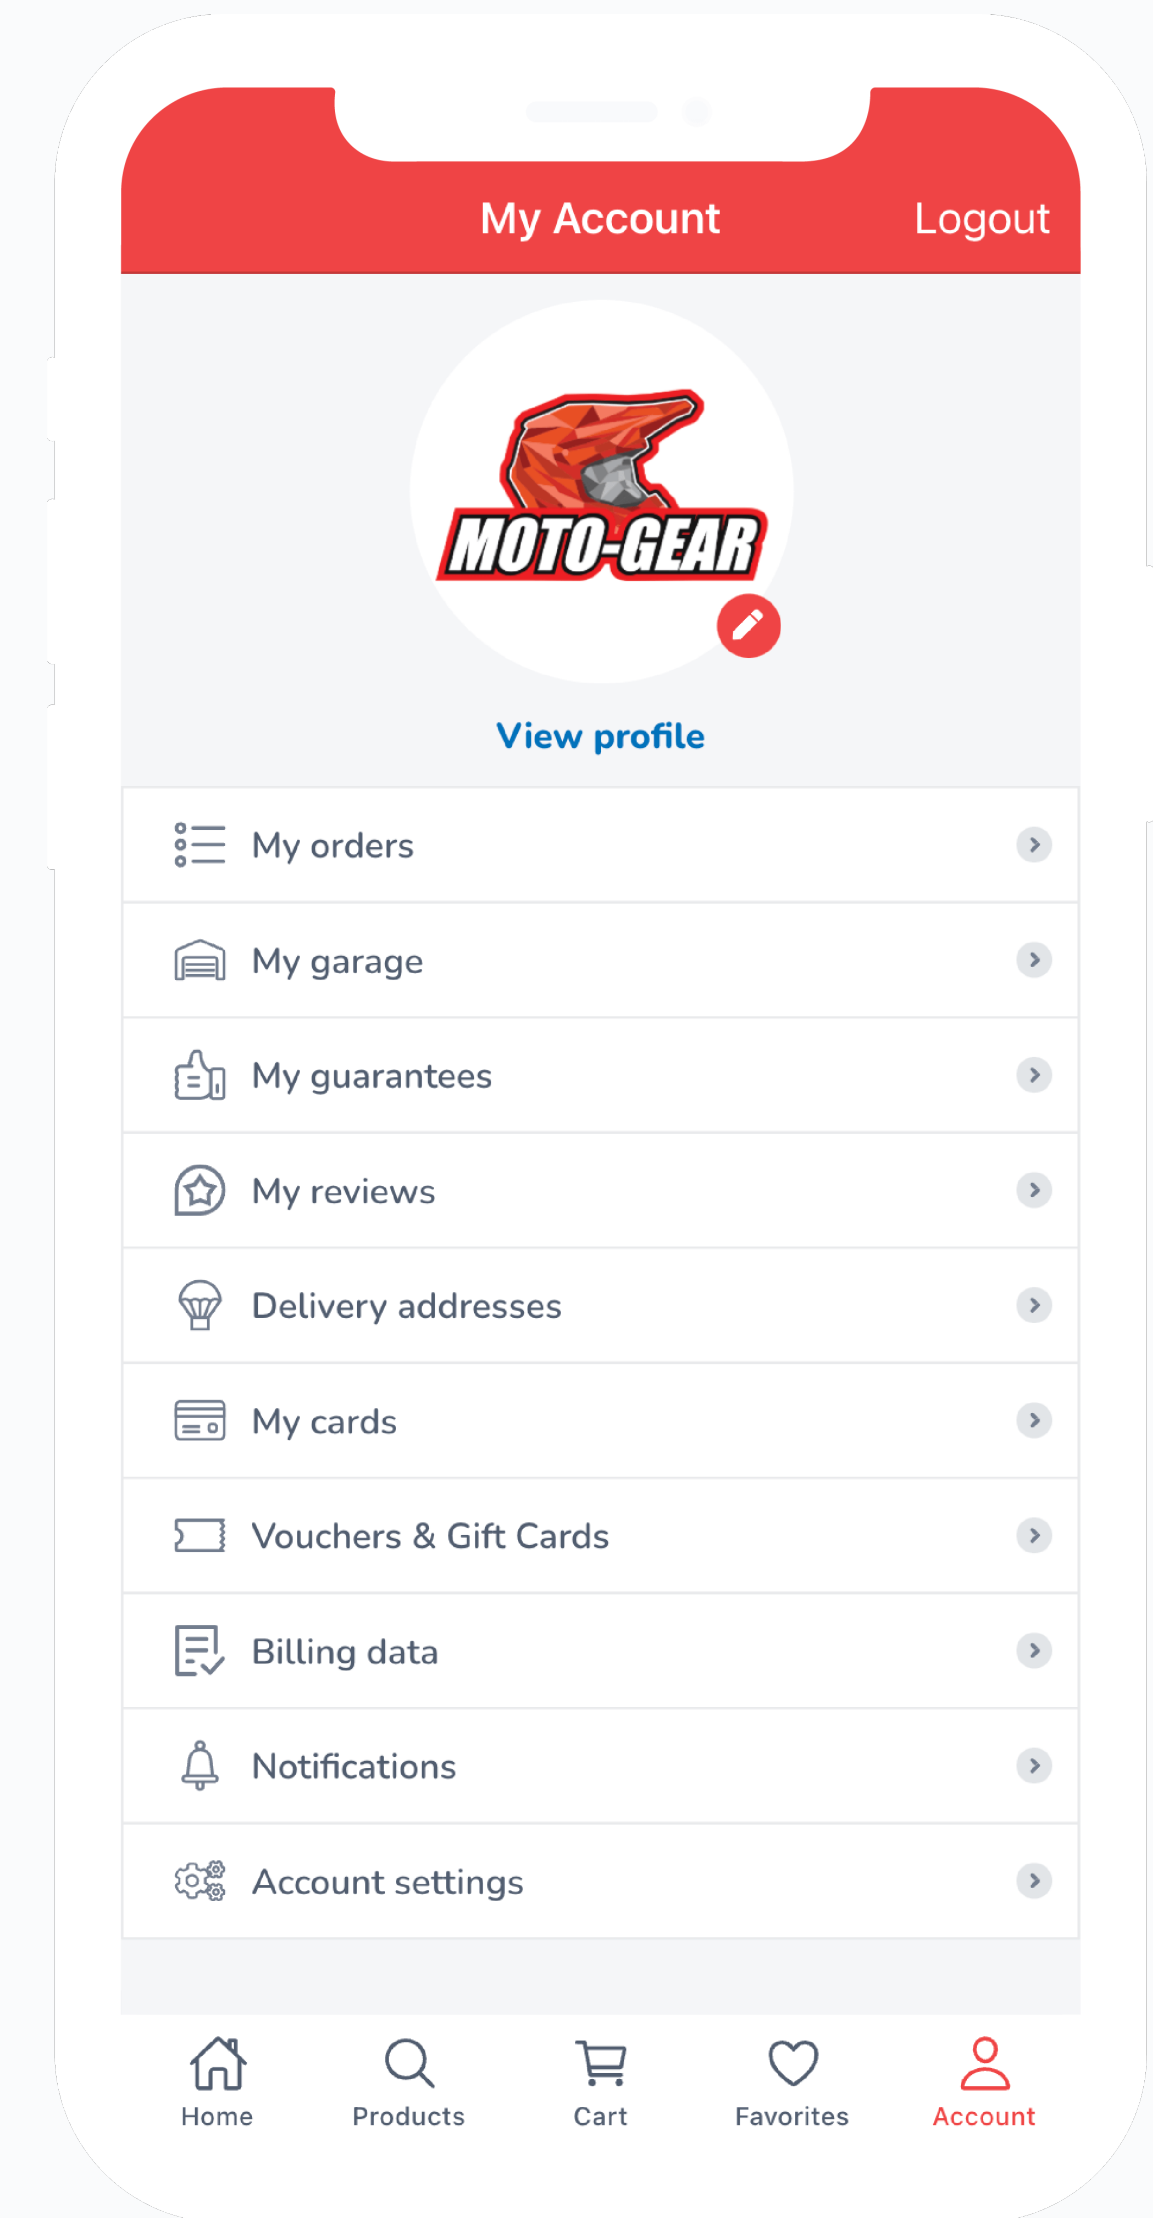

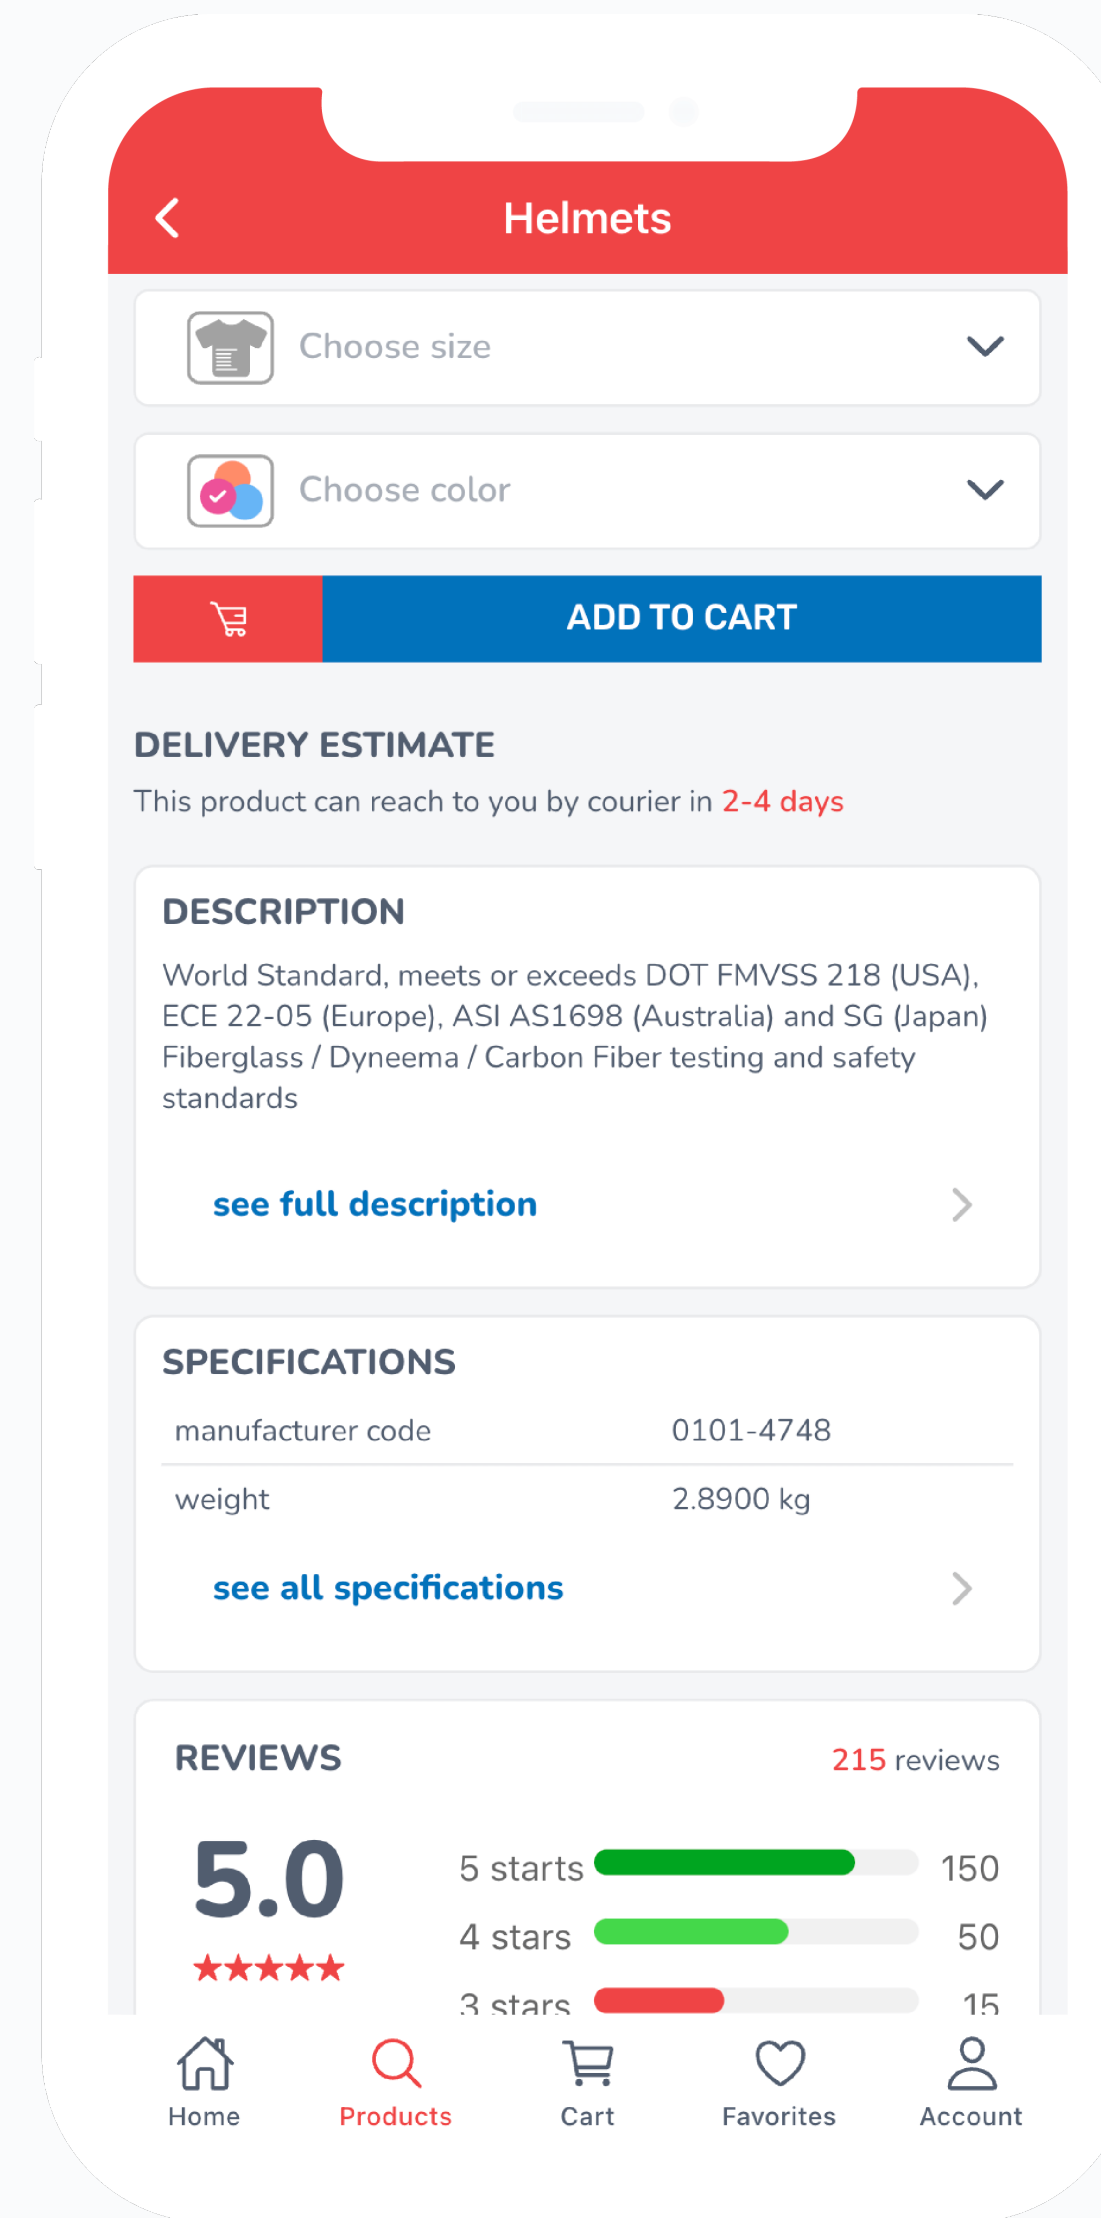

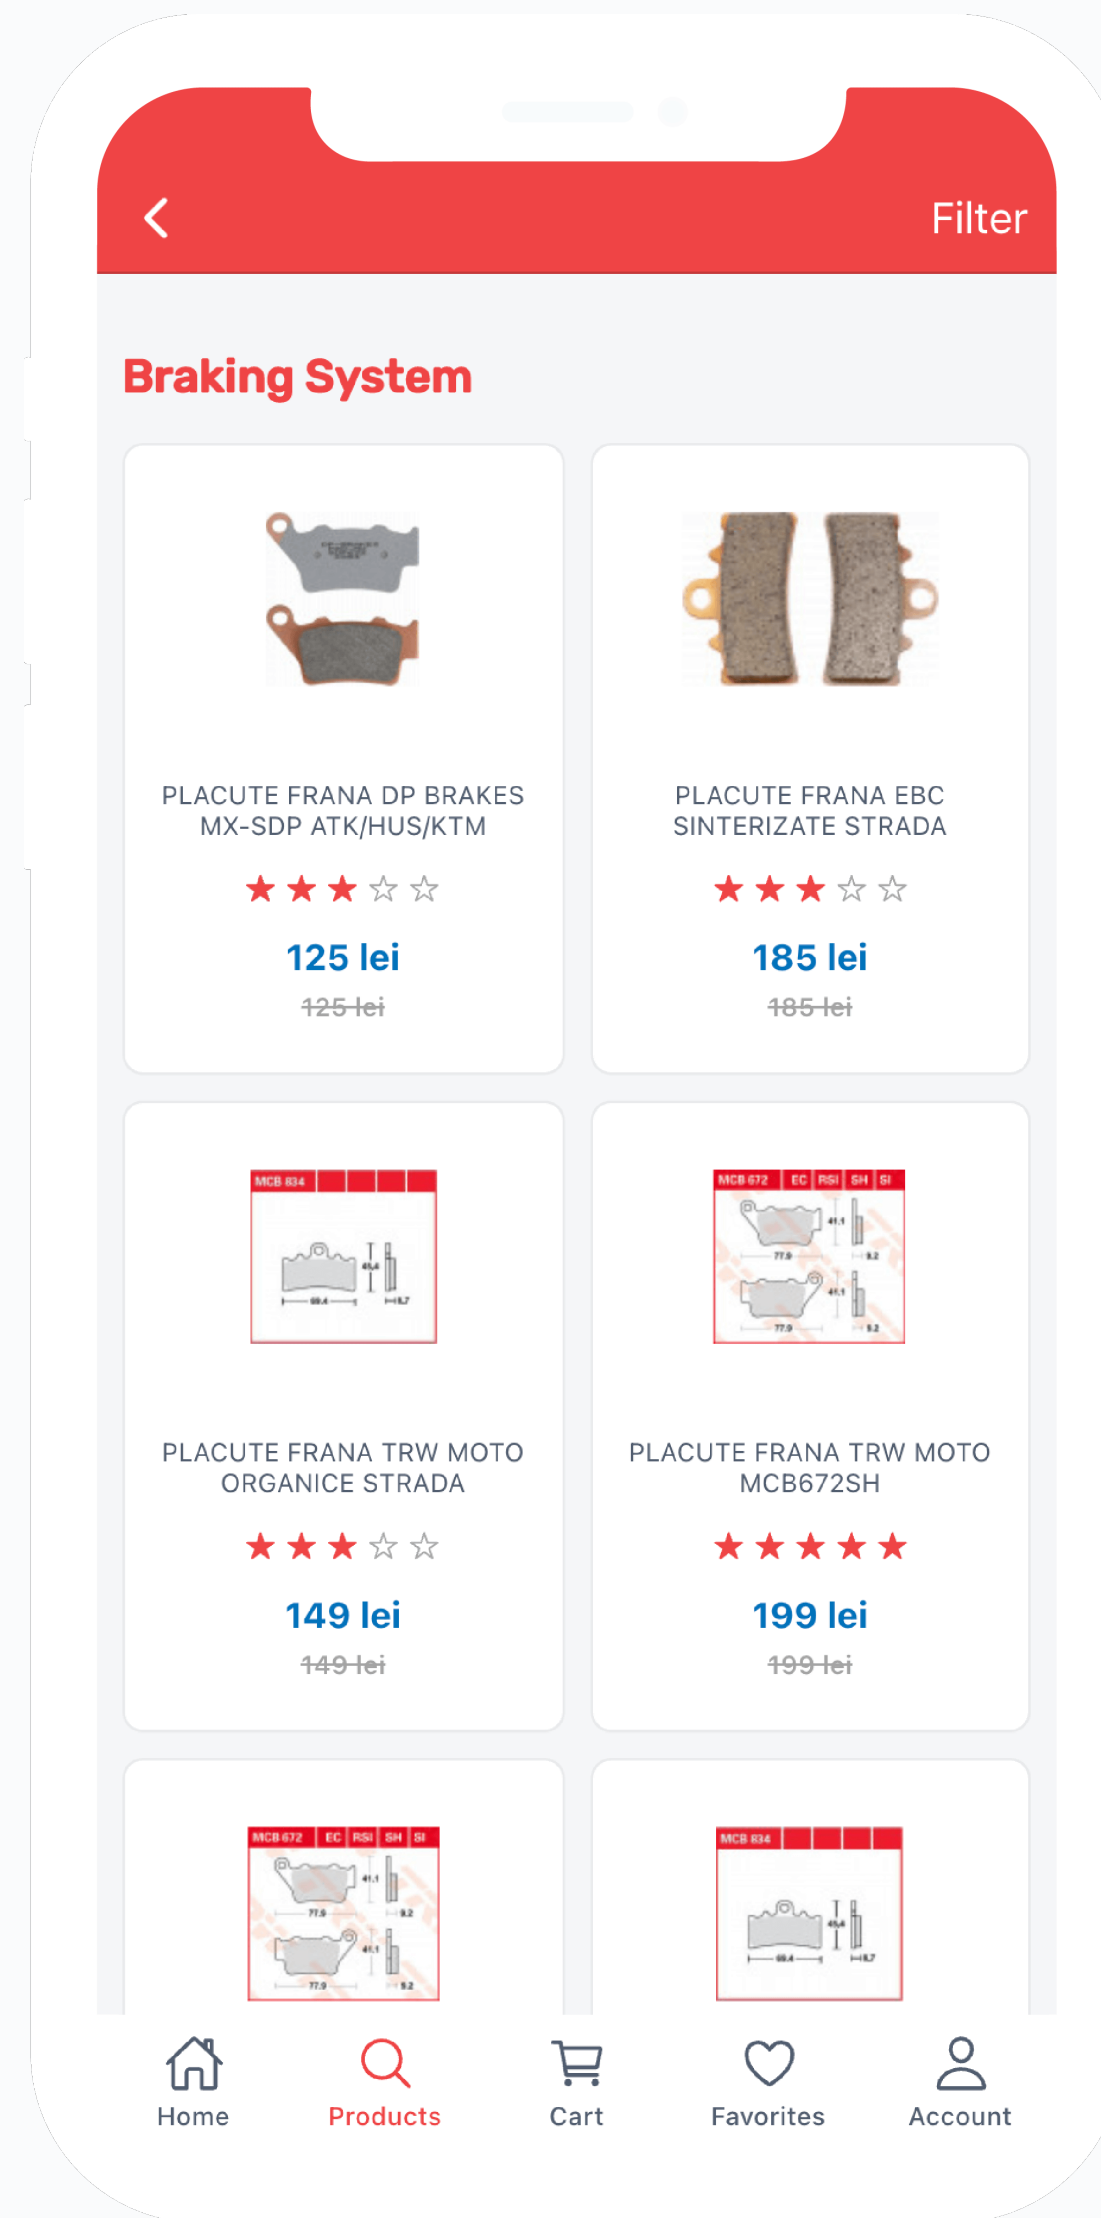

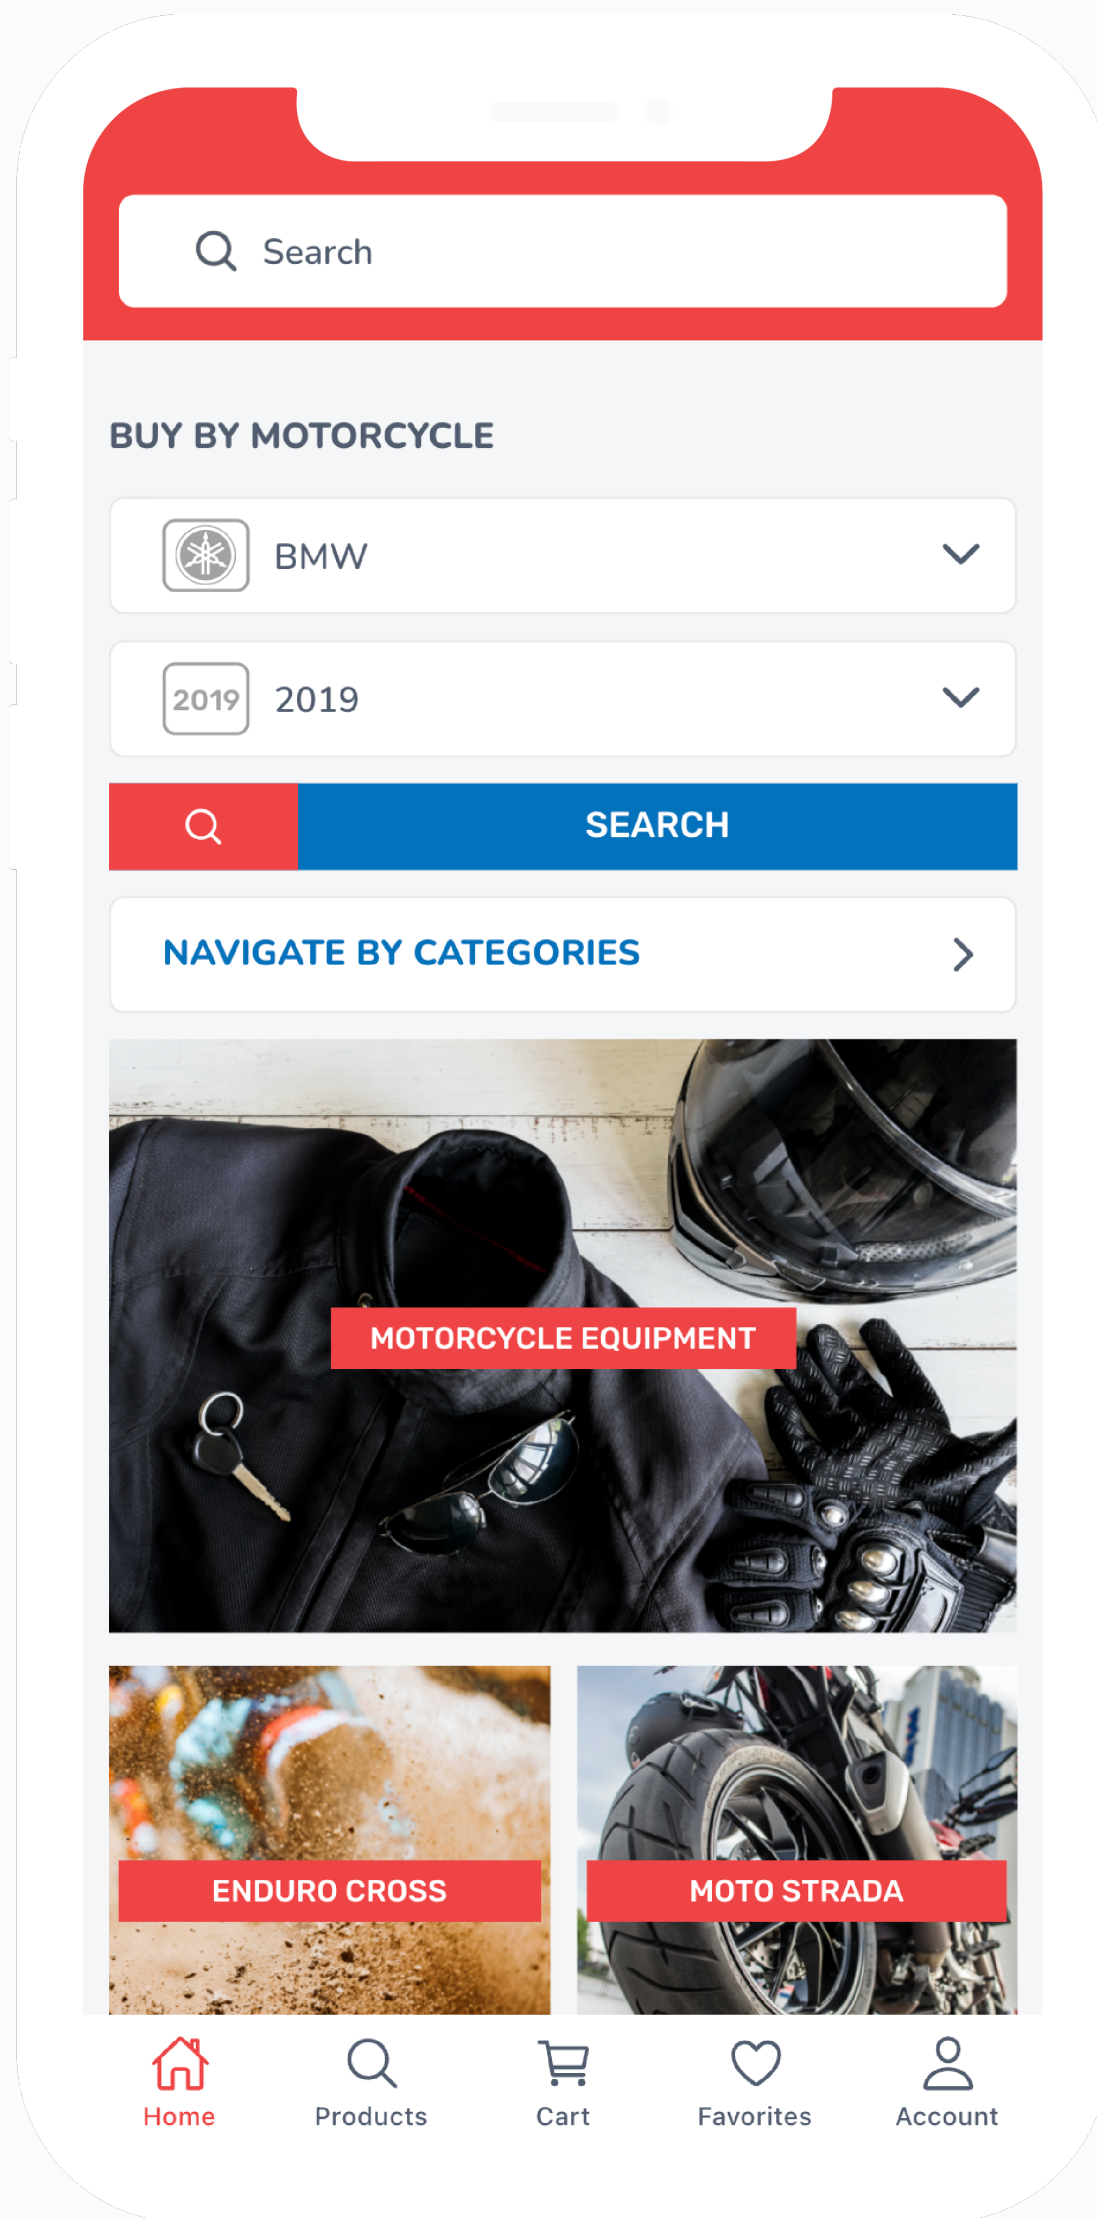

***MOTO-GEAR***®

## Moto-Gear

### Cross-platform mobile application.

Moto-Gear® is an online store that sells products such as motorcycle equipment, enduro cross, moto street, ATV, harley davidson, vintage custom, snowmobile and jetski. Based on application's specifics, we started with the mockup & prototype over which we added the custom design. The front-end is developed with Angular.js and the back-end is developed with Ionic and compiled with Capacitor. We use the API that is consumed both in the mobile application and in the website. The API is built in PHP with Laravel Framework.
